BANO SYMPOSIUM

15th SYMPOSIUM OF THE BELGIAN ASSOCIATION FOR NEURO-ONCOLOGY

Controversies in Neuro-Oncology

Friday December 2nd 2016
Van der Valk Hotel Brussels Airport

PROGRAM

CONTROVERSIES IN NEURO-ONCOLOGY

Everybody involved in the care of neuro-oncology patients, is being confronted with challenging questions.

For that reason, the Belgian Association for Neuro-Oncology (BANO) decided to dedicate this year's annual meeting to controversies in Neuro-Oncology and managed to assemble a very attractive program with distinguished national and international speakers. Illustrative cases will be presented as connection to daily life clinical practice.

This year again, the BBTS (Belgian Brain Tumor Support) has made available 7.000 EUR for researchers in the field of neuro-oncology sending in an application before the 15th November 2016. More information can be found at the BBTS website (www.bbts.be). Both winners from last year will now present their work which has been supported by these prizes.

We are looking forward to welcoming you on December 2nd.

The BANO Board

Belgian Association for Neuro-Oncology

- 13:30 Welcome and registration
